

PRODUCT INFORMATION

0.020" CYLINDER HEAD SPACER SHIMS

Cylinder Head Spacer Shims help restore the valve train geometry, valve clearance, compression ratio and cam timing to factory specifications on engines where the cylinder head and/or block surfaces have been resurfaced below factory limits.

Shims from **Innovative Machine & Supply** are precision cut from 0.020" cold rolled steel. Shims are individually produced using our CNC laser. This eliminates the rolled edge present on shims that are manufactured using a punch press.

Shims from **Innovative Machine & Supply** are made from steel for several important reasons:

- 1) Steel has a higher heat tolerance than copper, the material used for some other cylinder head shims. In hotter running late model engines, heat resistance is very important to insure the integrity of the shim. Steel is superior for this environment.
- 2) Steel cylinder head shims have a hardness factor similar to that of the block. This allows the gasket fire ring to properly "crush" as the head is torqued to spec.
- 3) Steel shims are less likely to be damaged in shipping and from mishandling or mishaps in the shop.

Innovative Machine & Supply is dedicated to being the #1 manufacturer of cylinder head spacer shims. We are constantly developing new part numbers to meet the needs of the ever-changing engine rebuilding/ remanufacturing industry. If we do not have the part you need today, we will probably have it tomorrow. Many new part numbers are developed in response to the calls we receive; [please contact us if you do not find the shim for your application](#).

- **CATALOG VERSION 17.06 – Updated January 2018**
- **ALL SHIMS ALSO AVAILBLE IN 0.030, 0.040, & 0.060” THICKNESS**
- **CUSTOM DESIGNED SHIMS & GASKETS**
- **COPPER GASKETS FOR ANY ENGINE:
0.021 / 0.032 / 0.043 / 0.050 / 0.064 /
0.072 / 0.081 / 0.093”**
- **REVERSE ENGINEERING ON ANY PART**
- **FULL SERVICE DESIGN & MANUFACTURING**
